Dear Gang,

I was felled by either an aggressive re-invasion of the existing microbes that I had been fighting off or a recruited new tribe, so some of my thinking is fuzzy here.

I've gone through the response file and tried to make a suggested edit for all Chapter 3 comments, (but one as I am not sure what to do about the 2017 screening guidance form OPP). These are not meant to be what I think must be the solution, but at least one option to help us think our way through.

Anyway, the paper is attached for your general interest.
